

International Building Codes 2003

Emphasizing Chapters 7 & 9

Seminar

FEBRUARY 8, 2005

Presenter:

Rick Carroll (SBCCI) CBO, CFPS: Rick has over twenty years experience dealing with the Fire and Building Codes in conjunction with the NFPA Standards. He maintains certifications as a National Certified Instructor and also carries certification as SBCCI Code Analyst in Fire, Building, Plumbing, and Mechanical areas. His other certifications include; Certified Building Code Official; Certified Fire Protection Specialist; and member of National Institute for Certification and Engineering Technologies in Sprinkler, Fire Alarm, and Special Hazard Systems.

Overall Goal and Objectives:

This seminar will provide knowledge of general building planning and construction requirements, knowledge of the use, and application of building codes, emphasizing Chapters 7 and 9. Objectives are to develop the knowledge to practically apply building code requirements to common building planning practices.
